Open position for Mechanical engineer

[InoCure](#) is a startup in the Czech Republic manufacturing electrospinning devices and production lines for nanomaterials. InoCure is also actively involved in R&D of nanomaterials in the fields of drug delivery systems and regenerative medicine. At the moment we are looking for motivated mechanical engineers, who will:

- be involved in the design of the functional components of the electrospinning devices and helping with the design and manufacturing (3D printing) of the devices supporting the R&D team's work.
- be interested in the design and construction of the electrospinning devices and production lines for nanomaterial manufacturing.

We offer:

- work in automation/robotics (mostly [Omron](#))
- work in an international R&D team
- work with 3D print, CNC and other modern manufacturing technologies
- design in Autodesk Inventor
- excellent remuneration (60 – 80 000,- Kč / month, HPP), negotiable benefits

We Require:

- Previous experience in mechanical engineering & automation
- Initiative and invention
- Good command of English
- Fulltime commitment

If you're interested in this position, please send your CV to info@inocure.cz.
